Employment Intelligence Systems

Wisconsin workforce intelligence and program-design support

Workforce decisions built on better intelligence.

BILLS OF RIGHT LLC, through its Employment Intelligence Systems service brand, helps Wisconsin public agencies and community partners turn labor-market, participant, employer, and local economic information into practical employment and self-employment pathways.

Core capabilities

- **Opportunity mapping:** Identify realistic occupations, industries, employers, credentials, barriers, and income pathways for a defined Wisconsin population or region.
- **Program design:** Convert research into a service model, curriculum priorities, referral network, implementation plan, and measurable outcomes framework.
- **Partner intelligence:** Map employers, training providers, community organizations, public resources, and potential subcontracting partners.
- **Performance support:** Organize program measures and reporting structures so agencies and contractors can see progress, gaps, and next actions.

Signature entry offer: Opportunity-to-Outcomes 30-Day Pilot

A focused engagement for one agency, facility, program, or participant group. Deliverables can include a regional opportunity scan, barriers framework, recommended employment and self-employment pathways, training priorities, employer and partner targets, an implementation roadmap, proposed measures, and a leadership briefing.

Partner fit

Designed for Wisconsin workforce agencies, corrections and reentry programs, human-services departments, workforce boards and contracted providers, community and technical colleges, nonprofit providers, and prime government contractors seeking specialized support.

Why this model

Wisconsin-first focus. Human-centered pathways. Evidence translated into implementation. A defined pilot scope that lets buyers evaluate fit before considering a larger engagement.
